

INTRODUCING RANGE ROVER SPORT SV EDITION TWO: THE DEFINITION OF SPORTING LUXURY RETURNS OFFERING NEW, MODERN DESIGN CHOICES

7 AUGUST 2024

The Range Rover Sport SV sets the benchmark in its segment with unmatched world-first technologies and dynamic capability in an assertive, modern vision of sporting luxury.

- **Extreme performance:** Range Rover Sport SV takes the sporting attitude, dynamic capability and assertive presence of Range Rover Sport to the next level
- **New for 2024:** Introducing Range Rover Sport SV EDITION TWO, featuring four distinct design curations for 2024 which further enhance its dramatic road presence
- **Technical Design:** A choice of four fresh colours including exclusive Blue Nebula Matte, with new forged carbon fibre finisher options
- **Breadth of capability:** The most powerful and dynamic Range Rover Sport blends supreme performance and dynamism with Range Rover modern luxury, refinement and reductive design
- **Perfect poise:** Hydraulic interlinked 6D Dynamics suspension with pitch and roll control maintains a near-level stance during extreme acceleration, braking and cornering
- **Stopping power:** Lightweight and powerful Brembo Carbon Ceramic Brakes option provides outstanding braking performance, paired with eight-piston SV front calipers
- **Lightweight focus:** Pioneering 23-inch Carbon Fibre Wheel option contributes to 76kg total weight saving¹, minimising un-sprung mass, improving handling, acceleration and ride quality

- **Top performer:** The most powerful Range Rover ever, mild-hybrid Twin Turbo V8 engine produces 635PS and 750Nm², accelerating from 0-60mph in as little as 3.6 seconds³
- **Ultimate experience:** SV Mode amplifies the benefit of Range Rover Sport SV's updated hardware, intensifying its sporting attitude to deliver the purest dynamic experience
- **Calming comfort:** Body and Soul Seat enables Range Rover clients to feel the sound and experience wellness benefits, incorporating the latest in-car sensory audio technology
- **Stay informed:** Visit www.rangerover.com for more information on the Range Rover Sport line-up, including SV EDITION TWO and to register for updates on future SV model availability

The Range Rover Sport SV sets the benchmark in its segment with unmatched world-first technologies and dynamic capability in an assertive, modern vision of sporting luxury.

Today, Range Rover announces the continuation of its high-performance SUV flagship: introducing the Range Rover Sport SV EDITION TWO.

The new Range Rover Sport SV EDITION TWO offers a dramatic performance-honed exterior, with four new themes announced for 2024. Each theme has been carefully curated to ensure its assertive presence and sporting personality on the road: Blue Nebula Matte, Ligurian Black Gloss, Marl Grey Gloss and Sunrise Copper Satin.

Each curation blends unique exterior paint colourways, with new carbon fibre finishers and SV Performance seats in a range of colours, which offer clients a choice of innovative knit textiles or Windsor leather, for a dynamic, technical and cossetting interior space. Range Rover Sport SV EDITION TWO also features exclusive branding on the front splitter, centre console, treadplates and puddle lamps; a mark of sporting luxury that makes it instantly recognisable.

"What makes Range Rover Sport SV so desirable is its unique combination of dynamic performance, modern sporting luxury design, its cutting-edge sensory technology and breadth of capability. For the first year, this was initially only open to clients by reservation. Today we announce the next step in our SV line-up, Range Rover Sport SV EDITION TWO, available with new design themes which offer our discerning clients the chance to enjoy four distinct characters of our high-performance luxury SUV."

Range Rover Sport SV is the most powerful and dynamic Range Rover Sport ever, blending supreme performance and dynamism with peerless Range Rover capability, refinement and reductive design. Its array of performance-enhancing technologies includes the most advanced suspension system in its class⁸ and a sensory audio system with wellness benefits.

Inherent to the high-performance credentials of Range Rover Sport SV, an exclusive airflow-enhanced design delivers a more assertive and grounded aesthetic, with functional lightweight and technical material choices throughout reinforcing its high-performance capabilities.

Powered exclusively by a 635PS, 750Nm² 4.4-litre Twin-Turbo MHEV V8 petrol engine, Range Rover Sport SV is capable of accelerating from 0-60mph in as little as 3.6 seconds³ and a top speed of 180mph.

This outstanding performance is enabled by a combination of features that deliver a weight saving of up to 76kg¹, including Carbon Ceramic Brakes option, and standard-fit aerodynamic enhancements including a carbon fibre bonnet.

Clients can now also specify a specially designed summer tyre⁴ for Range Rover Sport SV, which extends the car's cornering capability, with up to 1.2G steady-state lateral acceleration achievable in the dry (0.1G increase vs the standard-fit all-season tyre).

Created with technical partner Michelin, the Pilot Sport S 5 tyre (275/40R23 front, 305/35R23 rear) features a variety of different compounds across the tread width to maximise dynamic performance and wear.

For winter or all-terrain use, the standard-fit Michelin Pilot Sport All Season 4 tyres, which feature a unique construction, tread pattern and compound, are recommended.

SV EDITION TWO: DESIGN CURATIONS

Four new curations that are unique to new SV EDITION TWO offer visually striking variations.

Immediately dramatic, the Blue Nebula specification features a matte finish – the colour itself inspired by the Northern Atlantic coast, containing a hint of green, finished with a colour shifting effect. This is paired with the new Satin Forged Carbon exterior pack, a painted carbon-fibre bonnet and 23-inch forged black alloy wheels – complemented by Blue Nebula brake calipers. Inside, SV Performance Seats are finished in Light Cloud and Ebony Windsor leather.

For the second curation, a Marl Grey Gloss exterior is paired with a Gloss Carbon Twill exterior pack, Exposed Carbon Twill bonnet and 23-inch Carbon Gloss wheels with Sunrise Copper calipers, offered with a Rosewood and Ebony Windsor interior.

The third curation offers a Sunrise Copper Satin exterior finish, with Satin Carbon Twill exterior pack, painted carbon fibre bonnet and a 23-inch forged black alloy wheel with red anodised calipers. Inside, the seats are upholstered in Ebony Windsor leather.

The fourth and final exclusive curation features a Ligurian Black Gloss exterior with Satin Carbon Twill exterior pack, exposed carbon fibre bonnet and 23-inch Carbon Gloss wheels with contrasting Nano Yellow brake caliper, and Cinder and Ebony interior in Knit and Ultrafabrics™ PU.

For each curation, clients can opt for alternative wheels – including new 22-inch Diamond-Turned alloy wheels with Satin Dark Grey contrast – plus different brake caliper colours. The exterior of each SV EDITION TWO can be specified with a body-coloured roof, a new Satin Forged Carbon Fibre Pack, or Twill Carbon Fibre Pack introduced on SV EDITION ONE, as per the client's preference, and dependent on the exterior paint finish.

Inside, new Satin Forged Carbon Fibre trim finishers can be specified to match the exterior, with Twill Carbon Fibre trim finishers also available, with matching carbon fibre seat backs. Every SV EDITION TWO comes with Body and Soul Seats (BASS) and the option of Knit and Ultrafabrics™ PU, or Windsor leather.

Interior Design

Range Rover Sport SV's interior design enhances the connection between car and driver, reflecting its more focused, sporting character without compromising luxury or refinement.

Exclusive front SV Performance Seats feature integrated headrests, carbon fibre backboards, an illuminated SV logo and more sculpted bolsters to hold the driver and their front-seat passenger securely in place during high-performance driving. The 16-way adjustable seats feature massage functionality and are heated and cooled for maximum comfort. Cutting-edge Body and Soul Seat in-car sensory technology is fitted as standard.

Matching rear seats – also heated and cooled – feature a more dynamic design with pronounced side bolsters, yet retain powered recline and 60/40 split folding functionality.

Range Rover Sport SV's redesigned steering wheel features more pronounced thumb grips, a thicker rim and exclusive illuminated SV Mode button. A short press puts the vehicle into SV Mode, immediately configuring its suspension, powertrain, steering, transmission and Active Exhaust for maximum

performance. A long press opens the Configurable Dynamics menu, where the driver can tailor the dynamic characteristics of Range Rover Sport SV to suit their preferences.

The enlarged gear-shift paddles incorporate innovative LED Edge-Lighting Technology. The +/- symbols are illuminated white when the vehicle is switched on. When SV Mode is activated, the illumination changes to red.
